PROFESSIONAL EXPERIENCE

› Postdoctoral Researcher, École Polytechnique, France — Nov 2015 - present
Graph & Text Mining - CS Dept., DaSciM team
Research revolving around the key idea that *graphs can be represented as text and text can be represented as graphs*.
• Deep learning:
- social, bio & word graphs: classification, node embeddings/classification, link prediction,
- NLP: text classification and summarization.
• Influential spreader detection. Applications to social and word networks (keyword extraction, summarization).
• In charge of work package #5 (6 people) of the €11M OpenPaaS::NG project.
• Theorization of research ideas, design and implementation of experiments, writing and presentation of articles.
• Writing of proposals to public funding agencies and private companies.
• Supervision of PhD/MS students and interns.
• Development of interactive web apps to demo research (e.g., GoWvis).

› Data Science Consultant, remote — 2016 - present
• Technical leader of www.safetyfunction.com, developing AI solutions to improve safety performance of major construction companies.
• Freelance work.
• Advisor for startups.

› Graduate Research Assistant, University of Colorado at Boulder, USA — 2012-2015
Colorado Construction Safety Laboratory
Research funded by the NSF ($400K project) and the private sector.
• Data cleaning, diagnostics, visualization, feature engineering.
• NLP: attribute extraction from unstructured textual injury reports.
• Machine learning: predictive modeling of construction injuries.
• Probability and statistics: multivariate safety risk modeling and simulation.
• Reporting to sponsors via conference calls and presentations, vulgarization of the results.
• Collaboration with sponsors' IT teams for deployment of predictive models.

› Site Manager, Paris greater area, France — May-Aug 2011
ARTIS construction. €12M project. Daily coordination of 6 trades (30 people). Worked under pressure within a tight schedule and budget. Quality checking, reporting to owner.

› City Engineer, Montréal, Québec, Canada — Jul-Aug 2010
City of Montréal. Many assignments from CAD to site supervision, surveying, and pricing.

TEACHING

› Introduction to Text Mining and NLP (INF 582) — Spring 2017,18
École Polytechnique, France (3^{rd} year students).
Professor: Michalis Vazirgiannis
Topics: text representations (vector space model, graph-of-words, word and document embeddings), information retrieval, keyword extraction, unsupervised and supervised document classification, deep learning for NLP.
Mission: prepared code, data and handout for weekly 2-hour lab sessions

› Advanced Learning for Text and Graph Data (ALTeGraD) — Spring 2016,17, Fall 2017
MVA of ENS Cachan & MDS of École Polytechnique (top engineering schools grads specializing in data science).
Professor: Michalis Vazirgiannis

Topics: same as INF 582 + graph theory concepts, community detection, identification of influential spreaders, influence maximization, graph kernels, and deep learning for graphs.
Mission: same as INF 582 + created from scratch, administrated, and graded two Kaggle in-class competitions to evaluate students:
- email recipient recommendation (58 teams, 133 players)
- link prediction in citation networks (36 teams, 88 players)

› **Probability, Statistics and Decisions for Civil Engineers (CVEN 3227)** Spring 2014
University of Colorado at Boulder, USA (undergrads).
Professor: Ross B. Corotis
Topics: probability theory, random variables and probability distributions, covariance, stochastic processes, parameter estimation, probability density estimation, confidence intervals, statistical inference, hypothesis testing, regression/correlation analyses.
Mission: held bi-weekly office hours (15 students), gave 5 lectures throughout the semester (85 students). Designed and graded midterms and finals.
🏆 **Best TA award.**

EDUCATION

› **Ph.D. in Civil Engineering** - GPA: 3.95/4.00 2013-2015
University of Colorado at Boulder, USA
Advisors: Matthew R. Hallowell, Balaji Rajagopalan
Program ranked 9/145 in the US. Focused on statistics, data analysis, and programming courses with applications to hydroclimatology. Methods learned: CART, Bagging, Random Forest, Boosting, SVM, PCA, clustering (k-means, k-nn, hierarchical...), kernel density estimation, copulas, bootstrapping, Monte Carlo, risk analysis, Extreme Value Theory, (non)parametric regression, time series analysis, spatial analysis.
🏆 **Doctoral Assistantship for Excellence.**

› **M.S. in Civil Engineering** - GPA: 3.88/4.00 2011-2013
University of Colorado at Boulder, USA
Construction engineering, statistics, productivity, project management (lean/agile approaches).
Master's Research Thesis, 🏆 **Research Assistantship** (2 semesters).

› **M.S. in Mechanical & Electrical Engineering** 2009-2011
ESTP Paris, France. Maths, Physics, CS, structures, materials, electronics, mechanics, hydraulics... Merit-based selection for the double degree program with CU Boulder.

› **Classes préparatoires MPSI-MP** 2007-2009
Lycée Sainte-Marie, Antony, France. Intense training in Maths and Physics.

HONORS & AWARDS

- Best Teaching Assistant, Civil Engineering Dept., CU Boulder — Spring 2014
- Best Paper (CEM track), 120^{th} ASEE Annual Conference, Atlanta, GA — June 2013
- Doctoral Assistantship for Excellence, Civil Engineering Dept., CU Boulder — April 2013

</> COMPUTER SKILLS

Python 2/3, R. Keras, TensorFlow. Parallel and batch processing, cluster computing. Web apps with Shiny (reactive programming) and {C3, D3, vis}.js. APIs with Flask, Plumber, and Heroku. LaTeX, HTML. Windows, Unix.

LANGUAGES

English: fluent, French: native.

SERVICE

Reviewer for WSDM 2017, CIKM 2016, AAAI 2017

OTHER

IT: Colorado Construction Safety Laboratory website maintainer 2012-2015
Tennis: regional vice-champion (Paris area) with ESTP team, 1^{st} division 2011

ADVISEES

Ph.D.

- Guokan Shang (École Polytechnique/Linagora), *abstractive summarization* current (**one ACL paper**)

M.S.

Internships:

- Armita Khajeh Nassiri, *neural graph classification* Apr-May 2018
  (co-advised with Giannis Nikolentzos)
- Guillaume Leroy (2^{nd} year ENSTA ParisTech), *graph node embeddings* May-Aug 2017

École Polytechnique 3^{rd} year research project (Nov-Mar):

- Zekun Zhang & Wensi Ding, *abstractive summarization* (**one ACL paper**) 2016-17
- Irina Stolbova, *sentiment analysis* 2016-17
- Ndeye Fatou Diop, *word specificity scoring* 2016-17
- Dmitry Zhukov & Danilo Augusto, *graph-of-words embeddings* 2015-16
