Applications are invited for tenured faculty positions at Assistant and Full Professor level at the department of Informatics at Ecole Polytechnique, Paris France.

Ecole Polytechnique, the top French Graduate Schools of Engineering, offers multiple full-time academic positions at the level of Assistant (as Maître de Conférences) and Full professor, some of them in the area of Artificial Intelligence, with a focus on Deep and Machine Learning and applications in Images, NLP, Graphs. The relevant groups to host the new faculty members are the Data Science and Mining (DaSciM), Data Analytics (CeDar) and Geometric & Visual Computing (GeoViC). The hired faculty is to start in September 2020.

THE LOCATION
The faculty will be based in the Informatics Laboratory (LIX) of Ecole Polytechnique in the broader area of Paris. Ecole Polytechnique is the premier engineering University of France (highly ranked internationally according to the latest University rankings). Famous scientists (including Nobel prize and Field medal recipients) and industrial leaders are alumni of the school, offering an exceptional environment for research in the centre of the fast growing excellence pole of Saclay few km south of Paris. Ecole Polytechnique is as well the main founding member of the new INSTITUT POLYTECHNIQUE DE PARIS federating some of the best engineering schools of France.
